

DO YOU HAVE COMPLAINTS ABOUT THE DELIVERY OF YOUR GOODS?  
DOES YOUR PRODUCT NOT OCCUPY 100% OF THE PERIMETER OF THE PALLET?

WITH NIUPACK, SAY GOODBYE TO THE FEARED DOMINO EFFECT!

### PROBLEM

During transport, the pallets and goods move: abrupt stops, sudden accelerations, sharp curves.....and the situation gets worse when the pallets are half full. These normal movements cause the product to move and fall, and even in many cases the 'domino effect' between pallets. This means that our product will be systematically rejected along with the waste of time and money that it represents.

### WHAT IS NIUPACK?

Niupack is the ultimate solution to the shifting and falling of goods during transport. Its appearance is that of a piece of corrugated cardboard in a foldable honeycomb structure. Each piece is placed easily between the pallets, acting as separators. This way, product fall during transport is avoided.

### SOLUTION

Fill the existing gaps between pallets to reduce or eliminate rolling and overturning, tilting, or falling goods. It avoids the 'domino effect' and other movements caused by the starting and stopping of the transport vehicle

### SECTORS

Transport of goods, commodities, food, beverages, pharmaceuticals, chemicals, electronics, logistics, etc....

#### UNIQUE

There is no other similar solution on the market for road routes

#### EFFECTIVE

Tested on hundreds of road routes

#### RESISTANT

more than 4,000 kilograms of compressive strength  
compressive strength 4,081, 1 kgf \* (\*)  
Laboratory tested

#### 100%

#### RECYCLABLE

Promotes environmental and CSR policies

#### ECONOMICAL

Does not require expensive investments

#### EASY TO USE

No training required

#### REUSABLE

Thanks to its extraordinary resistance

#### FOLDABLE

Does not take up space
